Installation Instructions

1. Install the lock body

Put the lock body into the corresponding slot and fix the upper and lower screws.

Put the power cord on the front handle through the square steel bar.

The square steel passes through the square steel hole of the lock body, secure the handle.

2. Install front handle

Secure the two nut posts to the front handle.

Note: Square steel needs to be placed at the bottom.

3. Install the rear handle

Loosen the screws of the rear cover plate with a hexagon wrench and remove the rear cover plate.

Put one end of the power cord through the center hole of the rear handle.
4. Install the battery

Plug in the power cord and install the battery.

Fasten the rear cover plate and fix the screws of the rear cover plate.

Align the square steel bar, tighten it with long screws, and fix the rear handle.

Note: When connecting the power line, the red mark on the terminal block is inserted in the same direction as the port red mark
5. Complete and test

After installation, check the door opening.
